Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 10/31/07 has been entered.

Election/Restrictions

2. Claims 155-158, 161-174, 176 are allowable. The restriction requirement among species, as set forth in the Office action mailed on 5/16/06, has been reconsidered in view of the allowability of claims to the elected invention pursuant to MPEP § 821.04(a). **The restriction requirement is hereby withdrawn as to any claim that requires all the limitations of an allowable claim.** Claims 159-160, 175, directed to a species no longer withdrawn from consideration because the claim(s) requires all the limitations of an allowable claim.

In view of the above noted withdrawal of the restriction requirement, applicant is advised that if any claim presented in a continuation or divisional application is anticipated by, or includes all the limitations of, a claim that is allowable in the present application, such claim may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application.

Once a restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. See *In re Ziegler*, 443 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

Reasons For Allowance

3. The following is an examiner's statement of reasons for allowance: The prior art of record does not teach nor reasonably suggest a self-compensating dynamic balancer apparatus for a disk player which records and reproduces information from a disk installed on the disk player, having the combination of the following features: a non-magnetic hollow tube; and a mobile unit which comprises at least one rigid body and is disposed within the non-magnetic hollow tube, wherein the self-compensation dynamic balancer is locatable coaxial with a rotation axis about which the disk is rotated by rotational components of the disk player, wherein the self-compensation dynamic balancer rotates in use with at least one of rotational components, wherein the mobile unit is arranged to be freely movable within the non-magnetic hollow tube by centrifugal force generated by rotation of the disk such that the center of gravity of the self-compensating dynamic balancer moves to be located opposite to the center of gravity of the disk with respect to the rotation axis when an angular frequency of the disk is greater than a natural frequency of a deck plate of the disk player, wherein the natural frequency of the deck plate is determined by an elastic modulus of buffering members of the disk player and mass of the deck plate and other elements to be installed on the deck plate, and represents a rate of vibration in a horizontal direction, and wherein the self-compensating dynamic balancer is mounted to at least one among members which are rotated by the rotational force provided by a spindle motor, and the center of gravity of the self-compensating dynamic balancer is located

opposite to that of the disk with respect to a rotational shaft of the spindle motor by a centrifugal force generated during rotation of the disk, thereby to compensate for vibrations due to an eccentric center of gravity of the disk.

The Examiner agrees that the closest prior art (of Hellerich USP 3,854,347) does not expressly state or would have made it obvious to a skilled artisan to have modified the device of Hellerich to have included the self-compensating dynamic balancer configuration as now claimed and as set forth in Applicants' remarks (section III, pages 9-10).

4. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
